

*Rep. Rush Holt (NJ-12) issued the following statement after President Obama today met with a group of small business owners at Tastee Sub Shop in Edison to discuss the economy and strategies for economic growth.*

“I’m glad the President came to Central New Jersey to meet with small business owners here. Like the President, when I meet with small business owners in New Jersey, they know that businesses on Main Street - not Wall Street - are the real job creators in our economy and are key to our future economic growth. Having heard the concerns of business owners who are struggling to get the loans they need, I am working to ensure that big banks loan more to small businesses and to encourage small business investment and job creation by cutting taxes.”
