

Mr. Chair, I rise in opposition to the TRAIN Act. This misguided legislation would undermine the Environmental Protection Agency's ability to enforce the Clean Air Act and significantly limit the federal government's ability to ensure that the air we breathe is safe and pollution-free.

Some in the Majority have used the title of this legislation to refer to EPA's so-called regulatory train wreck. Well, the TRAIN Act amounts to a wrecking ball for public health protections.

Sadly, the TRAIN Act is the latest in a long line of bills from the majority that puts big polluters before the health and safety of the American people. From the Dirty Air Act that would remove EPA's statutory authority to regulate carbon pollution to legislation that removes accountability for offshore drilling operations, the majority seems intent on rolling back programs that preserve our environment, protect our public health, and grow our economy.

For forty years the Clean Air Act has been successful in protecting public health and preventing deaths from respiratory disease because it was written to follow science as science evolved. The success of the Clean Air Act is because its regulations are based in science. Legislators shouldn't pretend to be scientists.

I urge my colleagues to vote no on this bill.
